Dear Mr. Tammaro:

The H2O Innovation water system you sold us is truly amazing. Some of what you told me seemed as if it was too good to be true, but at this point any disbelief I had has been dispelled by the performance of the product in our office.

We have had the H2O Innovation water system in our office for nearly two years. It is a hot and cold water system. The water pipes in our office building are over 50 years old and the tap water from the kitchen sink was undrinkable. We now can drink the water right from the machine or use the hot water for soup, tea, oatmeal, etc. We also use the system to water our plants and they all look wonderful and healthy. Another benefit is that we don't have to purchase bottled water. We were able to get rid of the water cooler and no longer need to change the bottle or store 4 large bottles in our office.

We recently refurbished our office space and were without a kitchen for a month. The H2O system let us continue to have drinking water as well as the ability to rinse glasses and cups with the hot water. Needless to say we are very happy with the system.

What a wonderful product!

Sincerely,

Catherine A. Nelson
Office Manager
