To Whom It May Concern:

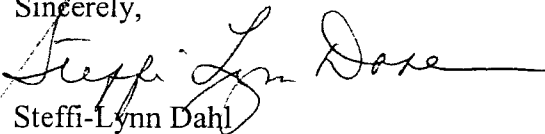

I would like to take this opportunity to thank our representative Ed Tamaro who has done a wonderful job of managing our account here at the Department of Surgery, at the State University of New York in Stony Brook.

We have had 5 bottleless machines installed in various offices throughout our department, as well as at our off-site locations, and have been very pleased with the quality of service provided by H2Only.

Everyone is pleased with the quality of the water and the machines themselves. Not to mention the fact that no one has to worry about having enough storage space for the bottles, but most of all, no one has to lift and replace empty bottles of water. The general consensus is that it is a great idea and there has been no negative feedback on the bottleless water machines being used.

We have recommended them to anyone who might question us regarding the bottleless machines and wish them continued success in providing this service.

Sincerely,

Steffi-Lynn Dahl
Project Staff Assistant
Department of Surgery
